REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-9 and 11-15 are distinguishable over the prior art. As per claims 1 and 11, the prior art of record does not show or reasonably suggest, in combination with the other claimed subject matter, methods of controlling shifting of an electrically variable transmission which includes taking into consideration a confidence factor related to the operating modes of first and second clutches whereby simultaneous application of the first and second clutches is inhibited (claim 1) or shifts out of an active mode are inhibited (claim 11), as claimed. As per claim 8, the prior art of record does not show or reasonably suggest, in combination with the other claimed subject matter, a method of controlling an electrically variable transmission which includes inhibiting simultaneous application of first and second clutches based on a predetermined relationship among proportional and derivative quantities of input member speed and synchronous speed, as claimed. Dependent claims 2-7, 9 and 12-15 are distinguishable for at least the same reasons. Note the application as filed did not include a claim 10.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited documents are of general interest and are directed to determining a "confidence factor" in the context of transmission control.
